

Josua Aleksi Kiviranta

Florence, Italy · +358 41 524 2441 · josua.kiviranta@gmail.com

Profile

Finnish software engineer and entrepreneur based in Florence. I help companies put artificial intelligence to work in everyday operations: automating repetitive tasks, cutting process time and cost, and making better use of data. In Finland I led project teams and delivered AI solutions for more than ten large enterprises, owning both the technical work and the client relationship. Today I serve my clients through my consultancy company, Sassosa.

Experience

Founder — Sassosa Consulting

2026 – Present · Florence, Italy

Building software applications and helping companies with AI transformation and workflow automation. Current clients include Finnish forestry companies and politicians.

AI Engineer / Project Manager — Innofactor Oyj

2024 – 2025 · Espoo, Finland

Led a team of four delivering AI solutions to 10+ enterprise clients, taking projects from proposal to production. Technical scope: agentic AI pipelines on Azure, task-optimized GPT Agents with retrieval and orchestration, structured evaluation frameworks, latency optimization, and CI/CD pipelines.

Contributed to sales and managed end-to-end project deliveries, translating business requirements into scalable technical solutions.

AI-focused Full Stack Engineer — Innofactor Oyj

2023 – 2024 · Espoo, Finland

Directed internal generative AI application development and quickly built working prototypes; developed and launched **Innofactor GPT Agents** at the same Nordic event where Microsoft launched Copilot. Advised on the company's generative AI strategy, coached colleagues in generative AI techniques, delivered public talks, and supported sales initiatives.

Founder — Pssst!

2022 – 2023 · Espoo, Finland

Built and led a three-person team; designed and built a web platform for referral-based recruiting. Managed product development and marketing, and acquired the initial client base.

Software Developer — Variantum Oy

2020 · Espoo, Finland

Built a UI for Variantum's enterprise product data management system (VariPDM).

Project Manager — Sterly Oy

2020 · Helsinki, Finland

Led a team of 13 in a high-urgency government-adjacent funding project during Covid-19; coordinated support for 100+ Finnish companies under strict time pressure.

Second Lieutenant — Finnish Defence Forces

2015 · Helsinki, Finland

Led a 35-person military police group; developed leadership and high-stakes decision-making skills.

Projects

Verba — verba.world

2025

LLM-powered language learning app that autodetects and translates all spoken words from YouTube videos. (React, Next.js, TypeScript, Python, Google Cloud, Azure OpenAI)

Social Synapse — socialsynapse.ai (archived)

2025

App for helping people make new connections, matching users by their thoughts and media consumption using semantic vectors. (React, Node.js, TypeScript, Python, Azure Cloud, Azure OpenAI, MCP)

Cyber Vulnerability Research — Finnish media

2019

Detected and disclosed a ranking-manipulation vulnerability affecting major Finnish newspapers. Built an online miner (Python) to detect and expose manipulation of item rankings and a proof-of-concept manipulation script (Node.js), then disclosed the findings to the affected newspapers.

Soteduunit.fi — soteduunit.fi

2021

Map-based job posting platform; designed and built a demo for Finnish healthcare and social welfare organisations. (React, Next.js, TypeScript)

Cryptocurrency Mining Farm

2017

Built and operated a medium-sized mining farm (over 800 MH/s) to finance my university studies.

Skills

In short	AI-powered automation, custom software development, project and team leadership
AI & LLM	Agentic pipeline design, RAG, context engineering, AI workflow evaluation and error analysis, MCP, vector databases, tracing, n8n, latency optimization
Cloud	Azure, Google Cloud, Docker, Azd, IaC, Bicep
Backend	Python, TypeScript, JavaScript, Node.js, REST APIs
Frontend	React, Next.js, Shadcn
Data & DB	Pandas, NumPy, PostgreSQL + vector extension, Firebase, Supabase, MongoDB
Engineering	Git, GitHub Workflows (CI/CD), version control, API design
Other	Project management, product development, cross-functional team collaboration

Education

Aalto University — M.Sc. Industrial Engineering & Management 2022 – 2023

Major: Strategy · Minor: Software Engineering.

Aalto University — B.Sc. Computer Science 2017 – 2022

Major: Computer Science · Minor: Industrial Engineering and Management

Thesis: *Open and linked parliamentary data and its utilisation*

GPA 4.02/5

Honors & Languages

Best Team Player of the Year Award — Innofactor Oyj 2024

Recognized for exceptional teamwork, innovative solutions, technical expertise, and effective communication in AI technologies.

Languages

Finnish (native) · English (fluent) · Italian (elementary, advancing).
